FUNCTIONAL

# TOUGH FITNESS ATTITUDE.

Becoming more 'functional' promotes a stronger, more versatile version of you. With every push, pull, twist, lift and jump, we train movements - not muscle.

By incorporating functional equipment such as Olympic bars, battle ropes, slam balls and steel dumbbells into our workouts we can elicit masses of power.

We create change. We improve. We become better humans.

# DETERMINATION IS POWER.

## PlyoStack **RSAC-10100**

Aim high, jump high. Plyometrics, or jump training, is designed to help athletes of all levels build power and explosiveness. Featuring a 5 tier design, the Reebok PlyoStack provides variable box jump heights for you to customise, aim high and achieve your personal best. Robust yet soft, the platform helps you to increase leg strength, stamina and jumping form.

## HEX DUMBBELL

- Rubber coated solid steel to reduce noise and damage
- Black knurled steel handle for a solid grip

Dumbbells are among the most widely used pieces of equipment and are a vital tool in any functional training regime. Strong and robust, the Reebok Hex Dumbbells are available in weights ranging from 5kg up to 50kg, and the black knurled steel handle ensures a solid grip whilst the hexagonal shape prevents the weights rolling during lifting sessions.

# STACKING IT UP.

Storage racks keep your weight plates organised and your training area neat and safe.

The horizontal plate storage provides easy access to your Olympic weights and is the rack you'll typically see at major weightlifting events alongside the lifting platform. It also features a handle on one end and wheels on the other to ensure it can be easily transported.

Alternatively, the vertical plate storage stacks your bumper weights up high meaning a much smaller footprint. It's solid and has wheels for better manoeuvrability.

## HORIZONTAL PLATE STORAGE

- Keeps weight plates organised
- Maintains neat & safe training areas
- Integrated handle and wheels
- Dimensions: 124 (L) x 30 (W) x 28 (H)

## VERTICAL PLATE STORAGE

- Space saving storage solution
- Integrated wheels
- Olympic bumper plate storage
- Dimensions: 61 (L) x 61 (W) x 104 (H)

# Back to basics

An effective means of improving strength gains, full-body conditioning, agility and balance, the Cast Iron Kettlebells from the Reebok Functional range are available in weights ranging from 4kg up to 50kg, making them ideal for progressive functional training.

# DEDICATED SPACE

The Reebok Lifting Platform provides a dedicated, solid and secure space for powerlifting and weight training circuits. 24 individual dense rubber tiles make up the 2m x 3m lifting platform which bolts securely into place within the interlocking steel frame.

Significantly reducing impact noise when lifting and dropping weights, the shock-absorbing rubber tiles prevent damage to floors and wear and tear on your strength training equipment.

Easy to assemble and tough enough for heavy-duty Olympic powerlifting sessions day-after-day, the Reebok Lifting Platform offers everything you need and much more. This is your territory, your dedicated zone and with a good platform underfoot, there's nothing to stop you beating your personal best.

***Dynamax***  
AMERICAN MADE. ATHLETE APPROVED.

# APPROVED BY ATHLETES

Introducing the Reebok Dynamax® Medicine Ball -  
Individually hand-made.

Measuring 35cm (14") in diameter, the Reebok Dynamax® Medicine Ball is designed to withstand regular and rigorous use, but at the same time is forgiving enough for users to safely catch the ball from a high velocity. Its solid and reliable construction means it keeps its shape after prolonged use.

The medicine ball's stitched design features a black shell with red panels, displaying the Reebok and Dynamax® logos and weight clearly. Its flexible surface successfully aids grip during workouts and can be easily cleaned due to its moisture resistant attributes.

Dynamax® medicine balls were the first on the market and are the ball of choice, used by over 90% of professional sports franchises and NCAA athletes throughout the USA. The Reebok Dynamax® collaboration ensures the ball is meticulously designed and constructed for throwing and handling, whilst effectively absorbing high impact.
