

Impact protection and accessories for sports, fitness and leisure

Impact Protection Slabs

If safety is exactly your thing!

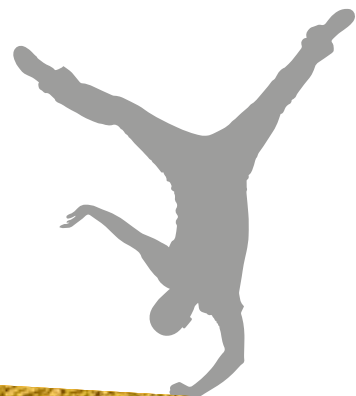

You like to spend your time outdoors in the nature and exercise and fitness you see as challenge?
But you should also think about your safety. Our impact protection slabs give you lots of safety!
And not only that. You have the choice between sufficiently different strengths, colors and surface structures.

You decide how cool your activities are.

Properties and advantages

- many friendly and strong colours
- different thicknesses for fall heights up to 3,0 m
- various variants with glitter, mulch structure or multi-colored rubber granules
- integrated pre-installed connector pins
- therefore fast and easy installation

Stepper

Even kids can be high flyers.

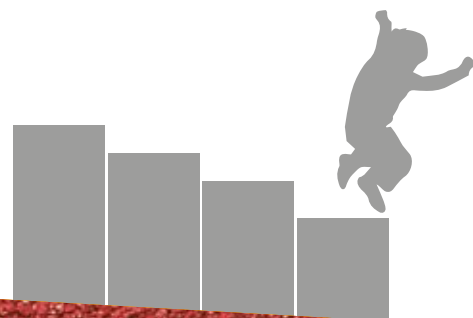

An essential skill for many sports and playing in general is maintaining balance while moving along a defined narrow path. To do this, an outstanding sense of balance and muscular coordination are required. EUROFLEX® Stepper balancing elements were designed specifically to help promote these abilities. Available in 4 different heights, they provide architects maximum freedom in creating adventurous walkways for children to master. The easy-to-install base socket (to be ordered separately) provides stable support and facilitates installation and removal.

Properties and advantages

- trains balance and coordination during playing
- also available with colourful motifs
- can also be used as a boundary for areas or as a seat
- ideal to be combined with other EUROFLEX® accessories
- the elastic material protects the joints and protects against injuries

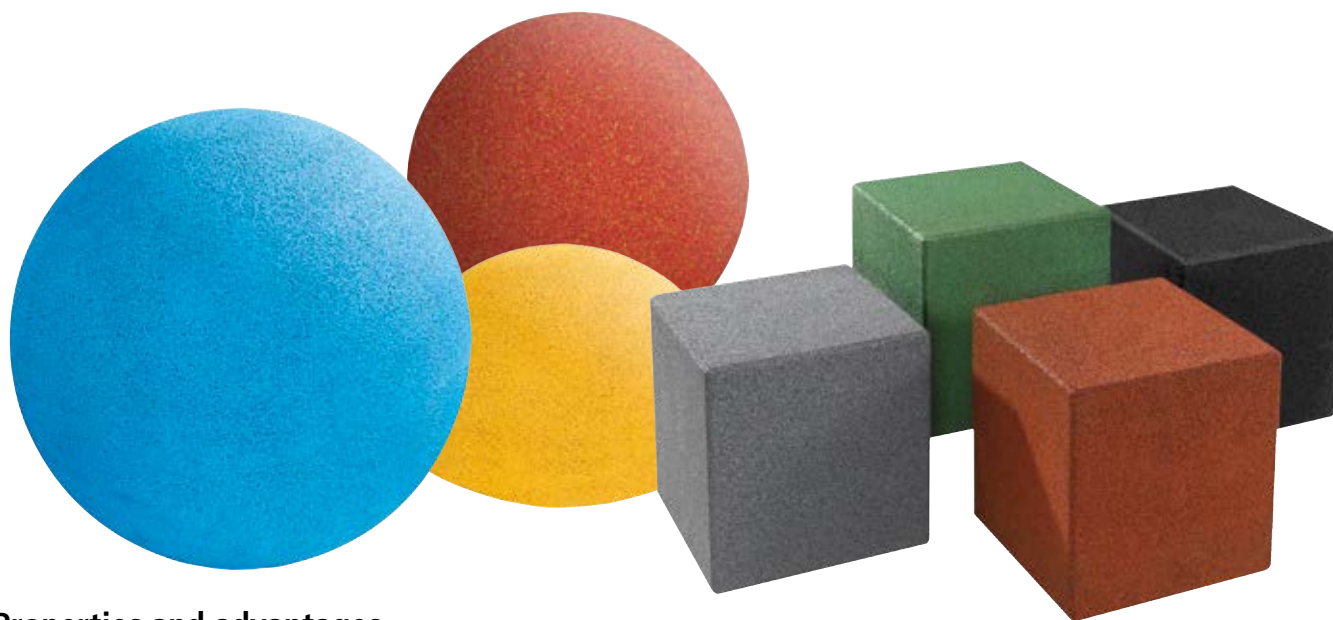

Ball, Halfball & Cube

Colored design elements for versatile use.

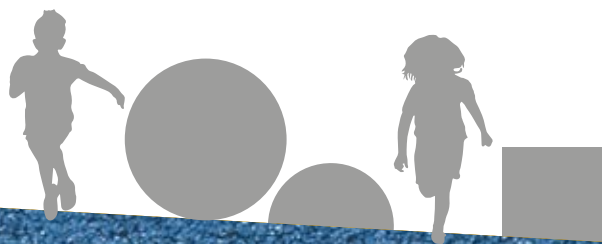

EUROFLEX® Ball, Half Ball and Cube are highly successful design components for distinctively noticeable playgrounds. Equally attractive whether used indoors or outdoors, EUROFLEX® Ball, Half Ball and Cube fits in with any surroundings due to its harmonic shape and rounds out the overall appearance of any playing surface. EUROFLEX® Ball, Half Ball and Cube can be mounted on either a steel anchor or a base slab, both of which are available as accessories. They are design elements for playing surfaces, seating, partitioning or decorative bordering on surfaces of all kinds including playgrounds, pedestrian zones, etc.

Properties and advantages

- Ideal for climbing and as a design or limiting element for playgrounds
- wide range of available colours
- different possible sizes
- stimulate kids to play and move on

IMPACT PROTECTION AND ACCESSORIES

made from recycled rubber granules
